

ACDelco Wiper Blades

The Choice is Clear!

August 2012

The Blades

Professional Wiper Blades

Performance Wiper Blade

- OE Service conventional aftermarket blade
- All metal blade made of high strength steel
- Direct-Fit Connector allows for quick and easy installation
- Includes rear integral blades on newer vehicle models

Beam Wiper Blade with Spoiler

- Direct-Fit Connector allows for quick and easy installation
- Coupler size varies depending on the length of the blade providing a more uniform wipe and optimal load distribution.
- Fits virtually all wiper arms directly without a need to replace adapters
- Specialized MGT (anti-friction) coating on wiper element reduces friction, lengthens life of blade, and provides better performance
- Universal adapter not needed

Advantage Wiper Blades

All-Season Metal Wiper Blade

- Universal fit conventional blade
- All metal blade construction
- Riveted superstructure for greater durability
- Dogleg blade design contains better on high wrap vehicles for better wipe quality

Advantage Beam Wiper Blade

- Riveted all metal superstructure
- Universal fit beam blade
- Latest wiper technology economically priced
- Coverage for most vehicles on road today

Specialty Blades

All Season Plus Wiper Blade (Conventional)

- Extra rugged superstructure
- Riveted hinges
- Gold line on wiper element marks blade as professional
- Coating on wiper element reduces friction, lengthens life of blade, and provides better performance

Classic Blade

- Silver finish on wiper blades resembles the original equipment blades on many classic cars and HD trucks.

Winter Blade

- Manufactured with a tough rubber boot and metal superstructure to resist snow and ice clogging
- Blades available to fit popular “pinch-tab” wiper arm applications

ACDelco vs. Competition

Tiered Branding	Blade Type	ACDelco	Anco	Rainex
Better	Conventional	Professional Performance	Aerovantage	Weatherbeater
	Beam	Professional Beam (with Spoiler)	Profile	Repel
Good	Conventional	Advantage All Season Metal	31 Series	N/A
	Beam	Advantage Beam	Contour	Repel
Specialty	Conventional	All Season Plus	N/A	Latitude
	Seasonal	Winter	Winter	N/A

It's Time to Change the Blades!

It is recommended that you inspect your wipers after six months.

Wiper Blades need to be changed if the following occurs:

- **Streaking:** Blurry vision caused by dry or dirty blades
- **Chattering:** Skipping of the blade caused by the permanent set of a curve in the rubber of old blades
- **Worn Rubber:** Rounded of the wiping edge caused by extended use
- **Split Rubber:** Cracked and split rubber caused by prolong exposure to the sun's ultraviolet rays
- **Bent Wiper Frame:** Bent or broke wiper frames may be caused by ice scrapers or automatic car washers
